SLC Who? Revitalizing The City College

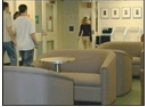

The Student Life Cycle (SLC) is committed to making George Brown and the college experience better for everybody.

The SLC Project involves a revitalization of all systems and services that affect Students, Faculty, Administrators, and Support Staff. The College is tackling satisfaction issues in a new way. Finally, your voice and that of many others is being heard in an integrated, team-driven change environment.

The SLC is bringing together people from all areas of the College to develop solutions that will work. Exciting SLC changes will be seen in the coming weeks. Students can look forward to a friendlier, more relaxing environment with an urban flare – some student areas and restrooms are getting a face-lift this summer. Other changes, like the redesign of the student information system and the building of two One-Stop Service Centres are set to roll out in the near future.

Be active, stay informed! Visit this site often for the latest SLC project updates. Have a question? [Contact Us](#).

Changing Spaces Embracing Our Urban Surroundings

Loft-like features are no longer being reserved for downtown condominiums. Exposed brick, metal, wood, and wide-open spaces are all a part of George Brown's physical changes planned for the new student service centres.

Students all agreed – the College lacked adequate areas to study, relax, and socialize. The SLC is improving student areas with an emphasis on learner-friendly spaces. Areas are being designed to support group interaction and technology-assisted learning. Furnishings will reflect a more modern look and feel while a café-style environment provides the inspiration for student gathering spots.
